

FRAGEN

FRAGEN

Leadership: Tilly Vriend and Mieke Verloo

While it is clear that gender equality as an object of policy-making originated in the feminist movements of the second part of the 20th century, this connexion has not yet been the object of serious systematic study.

FRAGEN aimed at opening up the material that is necessary for such an analysis. With the help of subcontractors for each country, FRAGEN compiled an analytical database of European texts from the women's movement, which is available via the FRAGEN webpage.
